

Step 1: Create a GIT Repository

1. Go to (link unavailable) and sign in to your account.
2. Click on the "+" button in the top-right corner and select "New repository".
3. Enter your enrollment number as the repository name.
4. Select "Public" or "Private" repository, depending on your preference.
5. Click on the "Create repository" button.

Step 2: Create Folders in the Repository

1. Go to your newly created repository on GitHub.
2. Click on the "Create new file" button.
3. Enter "Assignment_1" as the folder name, followed by a forward slash (/).
4. Click on the "Commit new file" button.
5. Repeat steps 2-4 to create the "Assignment_2" folder.
